# Digital Signage Systems

**The right information, at the right time, at the right place.**

Digital Signage Systems from multitech are installed in more than 20 countries.

Nearly all requirements in the Digital Signage range can be covered by our various products:

• for guiding your guests to the conference room
• for showing Public TV
• for advertising
• for displaying exchange rates
• for electronically door labelling
• and a lot more

Our products are manufactured not simply in large quantities, but completely specifically adapted on your individual demands. This refers to design as well as to technical specifications.

Beside standard design solutions we are specified to integrate our customer demands in our Digital Signage Solutions.
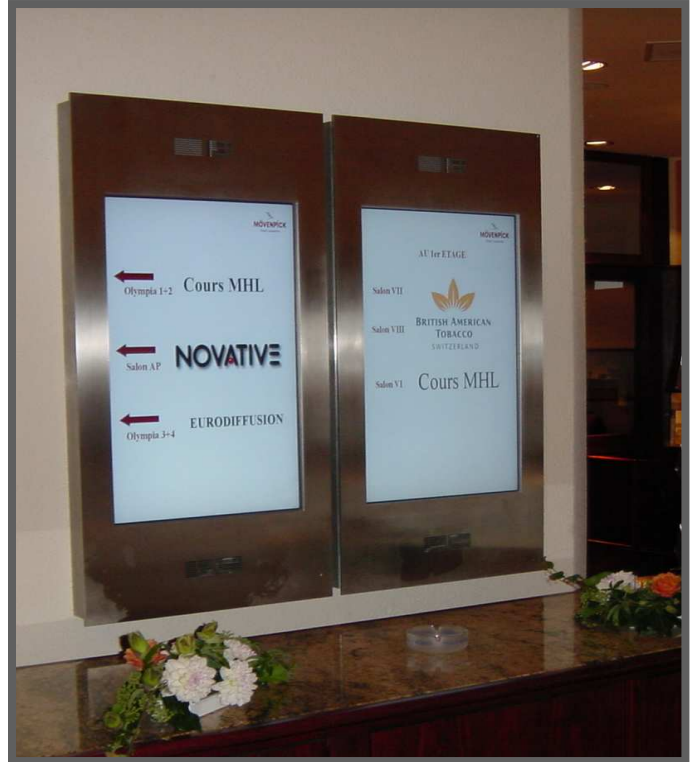

Our user friendly software is very easy to handle and it shows films, pictures and text on time on the display boards.

We provide skilled technicians for maintenance and service requests
